SGLang, A100, 300k pool
SGLang, A100, native pool (955,757)
vLLM 0.32, A100, 300k (1 fitted factor)
μ(n) (sessions/s)
closed population n
P(unstable 3000 s run from empty)
arrival rate / λref
predicted, fluid
predicted, + demand fluctuation (F1)
predicted, Stage C synchronized start
measured, sessions/s
measured, turns-based
F2 (primary)
A's level crossing (secondary)
